| Category D2: Physical CPU Cores (count):          | 16                             |
| Category D2: Base Processor Speed Per Core (GHz): | 2.4                            |
| Category D2: System Memory (GB):                  | 32                             |
| Category D2: Default Low-power Mode:              | Sleep Mode                     |
| Category D2: Long Idle Power Used for Sleep Mode: | No                             |
| Category D2: Off Mode (watts):                    | 0.9                            |
| Category D2: Sleep Mode (watts):                  | 1.2                            |
| Category D2: Long Idle (watts):                   | 18.2                           |
| Category D2: Short Idle (watts):                  | 19.3                           |
| Category D2: Base TEC Allowance (kWh):            | 45                             |
| Category D2: Functional Adder Allowances (kWh):   | 92.0                           |
| Category D2: TEC of Model (kWh):                  | 72.7                           |

|                                                                                                                                                      |                                                   |
